

John Paul Garcia

Castilla, Sorsogon • garciajohnpaulm@gmail.com • +639773910140

Education

STI College - Legazpi
BSIT

Legazpi, Albay
2019

Experience

The Attic AI

Full Stack Developer

Remote
Feb 2026 – Present

- Design and deliver new features across frontend and backend for AI-driven products
- Scan, triage, and remediate CVE vulnerabilities across application dependencies and container images
- Produce technical and security reports documenting findings, remediation, and compliance posture
- Debug and resolve production issues, maintain existing services, and improve code quality

Boom AI Solutions OPC

Software Engineer

Legazpi, AL
Jan 2021 – Feb 2026

- Created websites using vanilla and various JS (mainly ReactJS, NextJS, Gatsby) and CSS Frameworks (TailwindCSS, MaterialUI, Bootstrap)
- Built RESTful APIs using NodeJS, Python, PHP and AWS Services (Lambda, API Gateway)
- Created and customized WordPress plugins and themes
- Built real-time data sync for joining multiple databases with ETL pipelining using Apache Zookeeper, Kafka, Clickhouse and Debezium
- Designed queueing systems using RabbitMQ + Redis to lighten loads of system processes
- Created AI analysis to analyze call audio using Deepgram, GPT API and MongoDB

Boomsourcing

Jr Software Engineer

Legazpi, Albay
May 2019 – March 2020

- Created websites and components using ReactJS, GatsbyJS and other JS frameworks for frontend
- Created APIs powered by NodeJS
